

My name is Kara Hann and I work as a BCBA in the Stratford area of Connecticut. I work with children who are severely intellectually disabled and have autism. Many of these children desperately need home intervention to help decrease dangerous behaviors such as bolting away from home and eating non-edibles (PICA).

Licensure could help these families obtain private insurance funding for much needed ABA services in their homes. SB 1089 sections 23-29 is extremely important to the many families I serve. I support this bill, please pass it!
